

A brand-new space to reimagine aging

Our Mission

- Reimagine aging through wellness, connection, and lifelong learning — all in a vibrant, inclusive community space
- Help change the outdated national conversation around aging — how we think and talk about it

Our Goals

- Reduce social isolation
- Create an inclusive and welcoming space where older adults can thrive
- Inspire and enhance wellness, creativity, tech exploration, financial security, curiosity, and imagination
- Disrupt negative stereotypes about aging

At GenSpace, we emphasize creativity and learning because that's what keeps minds fertile and functioning at every age. It's a neighborhood space for forging new relationships — because social connection is what helps us stay vibrant, extends life, and makes it worth living. It serves as a community space for all generations — because older adults have so much to give and teach us all!
